

**WADSON**  
METALS

## **WELD CHECKER AND MONITOR FOR RESISTANCE WELDING**

### **Salient Features**

- Compact body with simple operation one button operations
- Very fast Detection speed.
- Adoptable to different welding current:
  - 50Hz/60Hz AC welding current
  - Single phase rectifier welding current
  - DC inversion welding current
  - Transistor welding current
  - Capacitance stored energy welding current
- Maximum and minimum detection function
- If the detected value is below the pre-set one, the alert signal will be displayed.
- It is helpful to manage welding quality.
- Plentifully matched power supply
- Applicable power supply: 100V~240ACV/50~60Hz
- LED display
- All the words can be seen clearly after adopting the LED.z
